Moeller

New Certified Healthcare Facility Design Professional at CDi Engineers

LYNNWOOD, Washington (June 13, 2008) – CDi Engineers is pleased to announce that Richard D. Moeller, a principal of the firm, recently attained certification as a Healthcare Facility Design Professional, administered through the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE). The Healthcare Facility Design Professional (HFDP) certification program was developed in collaboration with the American Society for Healthcare Engineering (ASHE) of the American Hospital Association (AHA), to create an examination designed to assess and certify an individual's understanding of the principles and best practices involved in HVAC&R design as they apply to healthcare facilities.

Dick Moeller's career includes 35 years of experience in the design and management of healthcare related projects. His expertise includes the design of HVAC systems for specialized patient care areas and equipment, medical gas systems, DWV plumbing systems, steam, hot and chilled water systems; central heating and cooling plants; campus distribution systems; building automation systems; master planning, energy studies; facility investigations, surveys, and assessments, system testing and balancing and project commissioning.

Dick is involved with many healthcare related activities including: the revision committee for the AIA published "Guidelines for Design and Construction of Hospital and Health Care Facilities;" an active member of ASHE, serving on many committees and as a faculty member of the ASHE Healthcare Construction Certification class; and is the chairman of the new ASHRAE committee for proposed Standard 189.2, "The Design, Construction and Operation of Green, High Performance Health Care Facilities."

He also earned the Senior ASHE designation (SASHE), which formally recognizes his contributions to the field of healthcare engineering through leadership, education, and publication, and he is a LEED® Accredited Professional.

CDi Engineers is a mechanical consulting firm headquartered in Lynnwood, Washington. www.cdiengineers.com
